

1. We have research interest & prod. responsibility in subject & have not been formally consulted about it -
Volunteer guidance we have given has not been heeded - defects not rectified.
2. Problem in estimating land use - which is geographic problem or which should use geog. analysis as corroborative material - economist - key personnel do not include geographer.
3. Project will result in statistical summation by province (acreage estimates by province for rice or seven crops)
Other significant state - including project we are working on - are by climatic region.
Need assessment of soil factors -
by irrigation factors }
from study of terrain elements

4. Budget matters -
why travel to Taiwan & Hong Kong -
for microfilming -
does not have control of

25X1A1a

25X9A6

M/Ag is against the project

M/Ag wants project on irrigation -
agreed with us on defects of project.

25X1A9a

 critical findings, were
overridden & ignored.

25X9A6

FDD has available all of the
materials presented to Babs by
 as the kind of materials the
project would turn up in Taiwan
& H.K.

Involves capabilities & guidance
which FDD can give. Procurement
processing - & synthesis of material

Talk about land utilization pattern - ?

What do you mean by homogeneous areas? - p. 2

p. 3 Finally, there will be some preliminary determination of topographical factors, soil type, and climatic data.
What is meant by this?
